

MAXXIS

MT212

Regional / Longhaul truck trailer tyres for highway applications.

STABILITY

DURABILITY

HIGH MILEAGE

RECOMMENDED 

Suitable for: Line Haul, General Cargo, Truck & Dog, Stock Floats and Tippers

TECHNOLOGY: FEATURES & BENEFITS

3 grooved zig-zag tread pattern - Ensuring excellent steer stability in both wet and dry conditions.

Solid shoulder - This provides equal pressure across the tread and shoulder area, preventing uneven wear, lengthening tyre life and maximising operational efficiencies.

Cut & Chip resistant tread compound - Helps reduce exposure to tread cutting, tearing and chipping, which would accelerate tread wear.

Excellent retreadability - Ensuring maximum return on investment.
